> **Antibody Sequencing**

> **Sequencing Services**

- Sanger Sequencing
- Next-Generation Sequencing (NGS)

> **Microbial Identification**

We offering this service to find out  
ribosomal RNA sequence by DNA  
sanger sequencing corresponding to  
the rRNA (16S/18S /ITS/26S  
rRNA).

> **Custom Antibodies**

Antibody development solutions,  
from antigen design to purification  
and screening.

> **Micro Satellite Genotyping**

Offering different number of  
approaches to genotyping, including  
analysis of single nucleotide  
polymorphisms (SNPs), variation of  
long or short tandem repeats and  
other DNA fingerprinting methods.

> **Gene Expression**

We offers a comprehensive set of  
real-time qPCR services, including  
gene expression, miRNA  
expression, SNP genotyping, copy  
number variation, and absolute  
quantification.

> **DNA Barcoding**

Our DNA barcoding service is cost-  
effective compared to traditional  
identification methods and it can  
even be applied when only a small  
amount of sample is available.
